

**Sprint 5: 2/27/2023 - 3/5/2023****What went well?****Abhay**

Everyone was on time, which gave everyone enough time to peer review designs.

**Anh**

Following Scrum process and adhering by it to complete tasks.

**Aster**

I personally did not do well this sprint at all.

**David**

I started off well in the beginning and was on track to being ahead of the plan schedule and my estimates for task completed took less time than estimated which was good. I think my estimations have been over estimation most of the time but I believe that is good to have in case something else is an under estimation then I will have time to complete everything.

**Sierra**

Everyone was able to commit time to complete their low level designs for a peer review and internal deadlines were met.

**What went wrong? / what could be improved?****Abhay**

I changed design 3 times during designing. Which could have been easily prevented if I did enough research to check the data and if it available. Where some data was discontinued and some were not useful. Which led me not being able to finish Tests for the feature.

**Anh**

I was quite busy this week this spring period and I could not get much work done.

**Aster**

I am behind in time by at least 10 hours according to project plan and project backlog hours.

**David**

I forgot to account for peer review during the sprint planning and had to change my focus away from my tasks to work on the peer review. This caused me to not be able to finish the tasks that was given to me and no progress being made near the end of the sprint. The mid-sprint deadline had everyone turn in their task on time this sprint but some work seemed rushed as there was no front end designs and the designs submitted was the bare minimum.

**Sierra**

The team still are not filling out scrum documents on time and there is little communication throughout the week. When I ask a question in the chat or post reminders to fill out scrum documents and deadlines they go unanswered.

**How can we improve?**
